

I-Command™ Instruments

Beautifully styled...

Specifically designed for

Evinrude® E-TEC™ V4 and V6 Engines

The **I-Command™ Instruments** are designed specifically for the NMEA (National Marine Electronics Association) 2000™ certified Evinrude® E-TEC™ outboards. I-Command instruments provide enhanced display of engine and boat performance information. Multiple functions are integrated into the easy-to-use tachometer and speedometer. Split screens allow display of user selected information. Additional individual instruments can be added with the "plug and play design". Multiple stations are easier to rig also. No special adapter boxes are required.

Look at all the information the I-Command Tachometer and Speedometer can provide just by pressing the up or down arrow on the dial:

TACHOMETER

RPM • Volts
Trim • Oil level
Fuel flow • Water pressure
Engine hours
Engine fault
Engine Temp

SPEEDOMETER

MPH – GPS, Paddle wheel or both
Fuel level • Remaining fuel
Average Economy
Multiple engine fuel rate
Low fuel warning
Trip fuel • Depth • Sea water temp

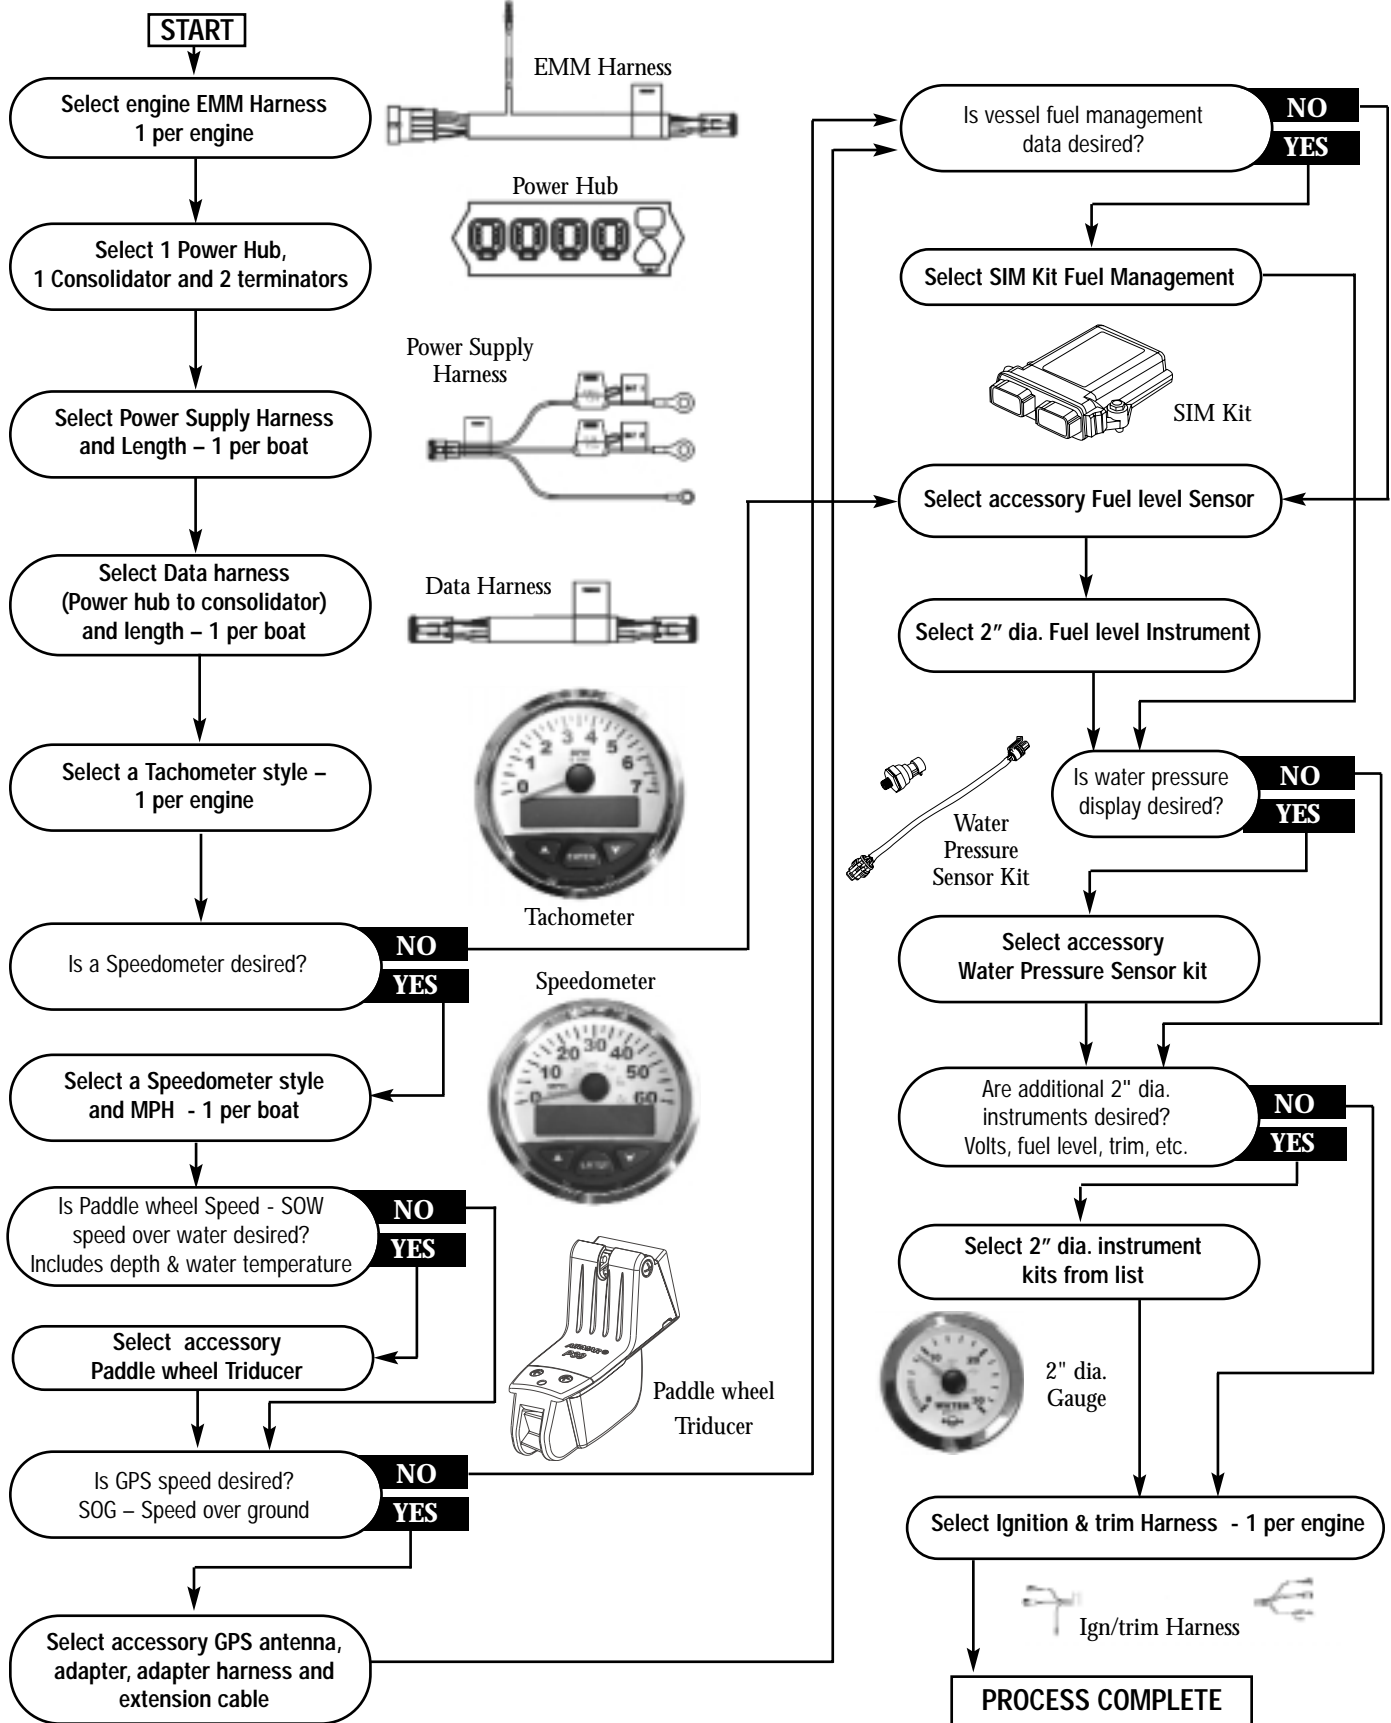

Use the I-Command Rigging Selection Guide and I-Command Order Form to easily select the I-Command system for the boat you are rigging.
